

Yucaipa Open 2018

Lakes course **Saturday** log
Total length: PRO 5050' AM 4798'
PDGA rules apply
ALL ASPHALT ROADS and LAKES OB
Concrete picnic pads safe

1. 300' - Original basket position. Right of marked line down right side of fairway OB. Road left/behind and beyond, OB. Pro/Adv cross over the bridge to next tee.
2. **AM:** 260' - From the concrete tee to the short position. Right side line and road and beyond OB
PRO/ADV: 512' - Temp tee is across the bridge at left end. Throw over the OB channel and tree/brush line to the short pin position up the grass fairway. Re-tee if you don't come to rest, or even pass over, the far side OB line along right side of the grass fairway.
3. 303' - From teepad, cross the road to short position. Road and beyond right is OB.
4. 252' - From teepad to left pin position near the road. Road and beyond left OB.
5. 177' - Original shorty teepad down to the basket. How much run-up do you need on this hole anyway?
6. 273' - Teepad to position up on hillside left. Stay left of the line drawn on the wall below or re-tee if never crossed over shoreline at any point. Coming to rest on the wall between fence and the *canal*, right of that line, is OB. On the wall between the fence and the *dirt shoreline*, **left** of that line---play it where it lies. Mark at base of wall below lie if no stance on top.
7. 186' - Up the middle from another *Teepad Light*. Road and beyond, downslope to the right, OB.
8. 249' - From teepad to original position. No OB left. Road and beyond, right, OB. **Mando** tree and drop zone protecting #9 teepad.
9. 315' - Left side of fairway, at the road edge. Road and beyond OB.
10. 216' - Regular teepad. Any resting position not on the island is OB.
11. 357' - Teepad is marked on asphalt road at the new restroom structure, to pin at left side island position. **Mando** tree with drop zone near end of fairway on the right to protect #12 tee. Road and beyond and any asphalt around island OB. Come to rest on the grass fairway straight/right out from the tee, or on the island, to be safe.
12. 286' - To original position around big tree. Road/parking lot and beyond OB.
13. 258' - Short position. Road and right OB.
14. 227' - Left, up to the log wall leading into a picnic area. **NO OB!!!!** Unless, that is, you somehow manage to roll all the way down into the lake, which, has happened. But hey, next tee is down there so ~~kick~~ drop your bag and finish, a few pounds lighter, up the hill.
15. 234' - Short position up the middle.
16. 192' - Uphill through two **mando** trees (drop zone in the middle) to a sharp left hook into a picnic area. Next tee back down the fairway to the lake.
17. 249' - From old teepad (set parallel to the lake) fairway runs along lake and to an elevated temp basket at the end of the tree-line. Stay left of **mando** tree w drop zone off right/front corner of the teepad. Retee may be your best option, here.
18. 201' - It's short...it's challenging...it's "The Goat Path". From teepad, up through the tree/shrub tunnel to basket on top. Asphalt road around island is OB. Other side of guard rail ok if not on the road. Also, an OB line along the near side of the shallow concrete culvert on top, protecting #19 teepad.
19. 263' - Short position. Road and left OB. Right side line and beyond OB.
